# 1 Key Properties

Key properties of the model

### 1.1 Key Properties

Key properties of the model

#### 1.1.1 Name \*

Name of coupled model

#### 1.1.2 Keywords \*

 $Keywords\ associated\ with\ coupled\ model$ 

#### Enter COMMA SEPERATED list:

#### 1.1.3 Overview \*

Top level overview of coupled model

#### 1.2 Flux Correction

Flux correction properties of the model

#### 1.2.1 Details \*

Describe if/how flux corrections are applied in the model

Enter TEXT:

### 1.3 Genealogy

Genealogy and history of the model

#### 1.3.1 Year Released \*

Year the model was released

Enter TEXT:

#### 1.3.2 CMIP3 Parent

CMIP3 parent if any

Enter TEXT:

#### 1.3.3 CMIP5 Parent

CMIP5 parent if any

#### 1.3.4 CMIP5 Differences

Briefly summarize the differences between this model and its CMIP5 parent, if applicable

Enter TEXT:

#### 1.3.5 Previous Name

Previously known as

Enter TEXT:

### 1.4 Software Properties

 $Software\ properties\ of\ model$ 

#### 1.4.1 Repository

Location of code for this component.

Enter TEXT:

#### 1.4.2 Code Version

Code version identifier.

Enter TEXT:

#### 1.4.3 Code Languages

 $Code\ language(s).$ 

Enter COMMA SEPERATED list:

#### 1.4.4 Components Structure

 $Describe\ how\ model\ realms\ are\ structured\ into\ independent\ software\ components\ (coupled\ via\ a\ coupler)\ and\ internal\ software\ components.$ 

Enter TEXT:

#### 1.4.5 Coupler

 $Overarching\ coupling\ framework\ for\ model.$ 

| Select | SINGLE | option: |
|--------|--------|---------|
|--------|--------|---------|

| Ш | OASIS - The OASIS coupler - prior to OASIS-MCT                             |
|---|--|
|   | OASIS3-MCT - The MCT variant of the OASIS coupler                          |
|   | ESMF - Vanilla Earth System Modelling Framework                            |
|   | NUOPC - National Unified Operational Prediction Capability variant of ESMF |
|   | Bespoke - Customised coupler developed for this model                      |
|   | Unknown - It is not known what/if-a coupler is used                        |
|   | None - No coupler is used  |

| Other - please specify:  |
|--|
| 1.5 Coupling   |
| 1.5.1 Overview   |
| Overview of in toplevel model.   |
| Enter TEXT:  |
| 1.5.2 Atmosphere Double Flux *   |
| Is the atmosphere passing a double flux to the ocean and sea ice (as opposed to a single one)?                             |
| Select either TRUE or FALSE:   |
| ☐ True ☐ False   |
| 1.5.3 Atmosphere Fluxes Calculation Grid Where are the air-sea fluxes calculated   |
| Select SINGLE option:  |
| Atmosphere grid  |
| Ocean grid   |
| Specific coupler grid  |
| Other - please specify:  |
| 1.5.4 Atmosphere Relative Winds *  |
| Are relative or absolute winds used to compute the flux? I.e. do ocean surface currents enter the wind stress calculation? |
| Select either TRUE or FALSE:   |
| ☐ True ☐ False   |
| 1.6 Tuning Applied   |
| Tuning methodology for model   |
| 1.6.1 Overview   |
| Overview of tuning methodology for model in toplevel model.  |
| Enter TEXT:  |

#### 1.6.2 Description \*

General overview description of tuning: explain and motivate the main targets and metrics/diagnostics retained. Document the relative weight given to climate performance metrics/diagnostics versus process oriented metrics/diagnostics, and on the possible conflicts with parameterization level tuning. In particular describe any struggle with a parameter value that required pushing it to its limits to solve a particular model deficiency.

Enter TEXT:

#### 1.6.3 Global Mean Metrics Used

List set of metrics/diagnostics of the global mean state used in tuning model

Enter COMMA SEPERATED list:

#### 1.6.4 Regional Metrics Used

List of regional metrics/diagnostics of mean state (e.g THC, AABW, regional means etc) used in tuning model/component

Enter COMMA SEPERATED list:

#### 1.6.5 Trend Metrics Used

 $List\ observed\ trend\ metrics/diagnostics\ used\ in\ tuning\ model/component\ (such\ as\ 20th\ century)$ 

Enter COMMA SEPERATED list:

#### 1.6.6 Energy Balance \*

Describe how energy balance was obtained in the full system: in the various components independently or at the components coupling stage?

Enter TEXT:

#### 1.6.7 Fresh Water Balance \*

 $Describe\ how\ fresh\_water\ balance\ was\ obtained\ in\ the\ full\ system:\ in\ the\ various\ components\ independently\ or\ at\ the\ components\ coupling\ stage?$ 

Enter TEXT:

#### 1.7 Conservation

Global convervation properties of the model

#### 1.7.1 Overview

Overview of global convervation properties of the model in toplevel model.

Enter TEXT:

#### 1.8 Heat

Global heat convervation properties of the model

#### 1.8.1 Global \*

Describe if/how heat is conserved globally

#### 1.8.2 Atmos Ocean Interface

Describe if/how heat is conserved at the atmosphere/ocean coupling interface

Enter TEXT:

#### 1.8.3 Atmos Land Interface \*

Describe if/how heat is conserved at the atmosphere/land coupling interface

Enter TEXT:

#### 1.8.4 Atmos Sea-ice Interface

Describe if/how heat is conserved at the atmosphere/sea-ice coupling interface

Enter TEXT:

#### 1.8.5 Ocean Seaice Interface

Describe if/how heat is conserved at the ocean/sea-ice coupling interface

Enter TEXT:

#### 1.8.6 Land Ocean Interface

Describe if/how heat is conserved at the land/ocean coupling interface

Enter TEXT:

#### 1.9 Fresh Water

Global fresh water convervation properties of the model

#### 1.9.1 Global \*

Describe if/how fresh\_water is conserved globally

Enter TEXT:

#### 1.9.2 Atmos Ocean Interface

 $Describe\ if/how\ fresh\_water\ is\ conserved\ at\ the\ atmosphere/ocean\ coupling\ interface$ 

Enter TEXT:

#### 1.9.3 Atmos Land Interface \*

Describe if/how fresh water is conserved at the atmosphere/land coupling interface

Enter TEXT:

#### 1.9.4 Atmos Sea-ice Interface

Describe if/how fresh water is conserved at the atmosphere/sea-ice coupling interface

#### 1.9.5 Ocean Seaice Interface

Describe if/how fresh water is conserved at the ocean/sea-ice coupling interface

Enter TEXT:

#### 1.9.6 Runoff

Describe how runoff is distributed and conserved

Enter TEXT:

#### 1.9.7 Iceberg Calving

Describe if/how iceberg calving is modeled and conserved

Enter TEXT:

#### 1.9.8 Endoreic Basins

 $Describe\ if/how\ endoreic\ basins\ (no\ ocean\ access)\ are\ treated$ 

Enter TEXT:

#### 1.9.9 Snow Accumulation

Describe how snow accumulation over land and over sea-ice is treated

Enter TEXT:

#### 1.10 Salt

Global salt convervation properties of the model

#### 1.10.1 Ocean Seaice Interface

Describe if/how salt is conserved at the ocean/sea-ice coupling interface

Enter TEXT:

#### 1.11 Momentum

Global momentum convervation properties of the model

#### **1.11.1** Details

Describe if/how momentum is conserved in the model

# 2 Radiative Forcings

Radiative forcings of the model for historical and scenario (aka Table 12.1 IPCC AR5)

### 2.1 Radiative Forcings

Radiative forcings of the model for historical and scenario (aka Table 12.1 IPCC AR5)

#### 2.1.1 Name

Commonly used name for the radiative forcings in toplevel model.

Enter TEXT:

#### 2.1.2 Overview

Overview of radiative forcings of the model for historical and scenario (aka table 12.1 ipcc ar5) in toplevel model.

Enter TEXT:

#### 2.2 Greenhouse Gases

Greenhouse gas forcing agents

#### 2.2.1 Overview

Overview of greenhouse gas forcing agents in toplevel model.

Enter TEXT:

#### 2.3 CO2

Carbon dioxide forcing

#### 2.3.1 Provision \*

 $How \ this \ forcing \ agent \ is \ provided \ (e.g. \ via \ concentrations, \ emission \ precursors, \ prognostically \ derived, \ etc.)$ 

| Selec      | Select MULTIPLE options:   |  |  |
|------------|--|--|--|
|            | N/A - Not applicable - forcing agent is not included   |  |  |
|            | M - Emissions and concentrations determined by the model state rather than externally prescribed                           |  |  |
|            | Y - Prescribed concentrations, distributions or time series data   |  |  |
|            | E - Concentrations calculated interactively driven by prescribed emissions or precursor emissions                          |  |  |
| prescribed | ES - Surface emissions (and 3-D concentrations away from the surface) derived via the model from the surface concentration |  |  |
|            | C - Fixed prescribed climatology of concentrations with no year-to-year variability  |  |  |
|            | Other - please specify:  |  |  |

#### 2.3.2 Additional Information

Additional information relating to the provision and implementation of this forcing agent (e.g. citations, use of non-standard datasets, explaining how multiple provisions are used, etc.).

Enter TEXT:
